

Maintain your vehicle. We all need clean air.

Air pollution causes health problems for many Texans, especially kids and older folks. You can do something about it by simply following your vehicle manufacturer's maintenance recommendations, making sure your car or truck is tuned up, and keeping your tires properly inflated. Turns out, what's good for the air can improve your gas mileage and save you money at the pump, too.

Share rides. Fight air pollution.

Air pollution causes health problems for many Texans, especially for kids and older folks. You can do something about it by driving less. Consider vanpooling or carpooling when you can, or taking public transportation. Fewer cars on the road mean fewer emissions, and that means healthier air for all of us.

Air pollution stinks. Buy a cleaner vehicle.

Polluted air causes health problems for many Texans, especially kids and older folks. You can do something about it by purchasing a cleaner vehicle. Consider a low-emissions model or hybrid when you buy a new or used vehicle. Cleaner running cars and trucks mean fewer emissions, and that means better air for all of us. Sweet.

Control your speed. Limit air pollution.

Polluted air causes health problems for many Texans, especially kids and older folks. You can do something about it by driving the speed limit – not faster. Driving the speed limit burns less fuel and reduces tailpipe emissions. It turns out, what’s good for the air can improve your gas mileage and save you money at the pump, too. That’s something to sing about.

**SPEED
LIMIT**

Idling cars pollute. Go inside and fetch.

Polluted air causes health problems for many Texans, especially kids and older folks. You can do something about it by avoiding idling in drive-through lanes with your engine running. Whenever you can, park and go inside or turn off your engine. You'll produce fewer emissions, get better gas mileage and help improve air quality in Texas. Good boy.
