**PLEASE SUBMIT A SEPARATE FORM FOR EACH INDUSTRIAL AND/OR SPECIAL WASTE TO BE DELIVERED TO THE CLINT LANDFILL.**

***Industrial Waste is defined by TCEQ as:***

Solid waste resulting from or incidental to any process of industry or manufacturing, or mining or agricultural operation, which may include hazardous waste as defined in this section. This type of waste is classified into the following three classes:

Class 1 wastes--Any industrial solid waste or mixture of industrial solid wastes which because of its concentration, or physical or chemical characteristics, is toxic, corrosive, flammable, a strong sensitizer or irritant, a generator of sudden pressure by decomposition, heat, or other means, or may pose a substantial present or potential danger to human health or the environment when improperly processed, stored, transported, or disposed of or otherwise managed, as further defined in §335.505 of this title (relating to Class 1 Waste Determination).

Class 2 wastes--Any individual solid waste or combination of industrial solid waste which cannot be described as hazardous, Class 1, or Class 3 as defined in §335.506 of this title (relating to Class 2 Waste Determination).

Class 3 wastes--Inert and essentially insoluble industrial solid waste, usually including, but not limited to, materials such as rock, brick, glass, dirt, and certain plastics and rubber, etc., that are not readily decomposable, as further defined in §335.507 of this title (relating to Class 3 Waste Determination).

**PLEASE BE ADVISED THAT CLINT LANDFILL IS NOT AUTHORIZED BY TCEQ TO RECEIVE CLASS 1 INDUSTRIAL WASTE!**

**Examples of *Special Waste* are:**

- asbestos-containing material
- ash (from incinerators)
- containers used for storing hazardous waste, pesticide, herbicide, rodenticide, fungicide
- contaminated soil
- dead animals
- foam rubber or Styrofoam
- food waste
- medical waste
- shredded automobiles and residual fluff
- slaughterhouse waste
- sludge
